ABSTRACT

This 25th Anniversary report provides information on the programs, students, and faculty at the University of Hawaii Community Colleges (UHCC) for the 1988-89 academic year. In the first section, system accomplishments are highlighted, including links formed with the community, cooperation with other institutions, and international education efforts. Next, following an organizational chart and mission statement for the colleges, data are provided on enrollments, degrees and certificates awarded, system resources, and program offerings. Profiles are then presented of students, faculty, and resource allocations at the UHCCs six community colleges and one training center. The final sections discuss the future of the UHCC with respect to access, retention, and the colleges' role in economic development and present a list of college staff. Highlighted findings include the following: (1) in fall 1989, the community colleges enrolled 20,533 regular credit students, with 49% of these in liberal arts and sciences programs; (2) 60% of the students attended part-time, their average age was 26 years old, and 57% were female; (3) in 1988-89, 10,026 Associate of Arts degrees, 6,081 Associate of Science degrees, and 808 certificates were awarded; (4) a total of $59,050,453 in general funds were allocated to the colleges for fiscal year 1989-90; and (5) a total of 972 faculty were employed, of whom 56% were employed full-time. (HAA)

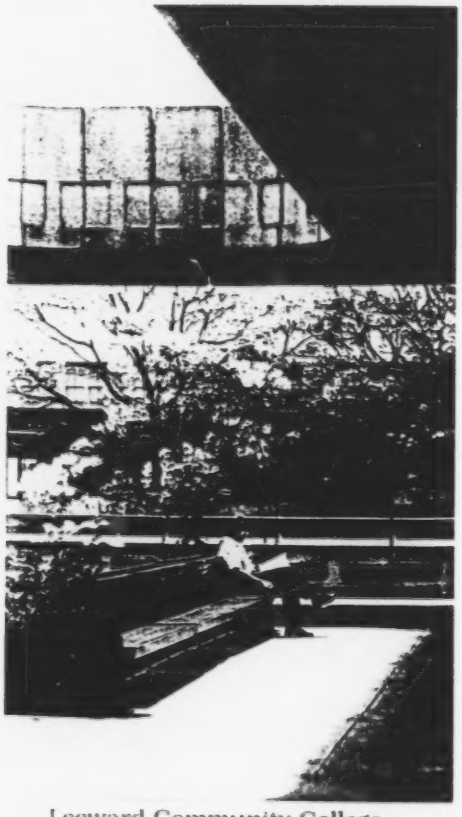
Honolulu Community College

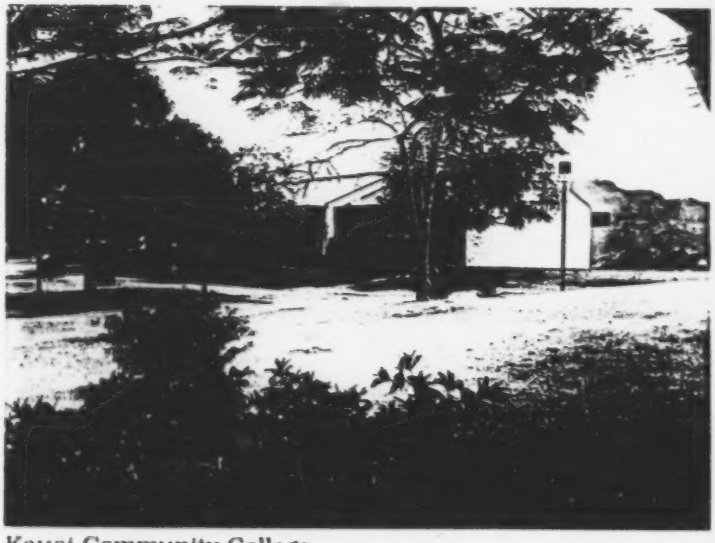
The University of Hawaii Community Colleges, part of the public higher education system in the state of Hawaii, provide a two-year Associate in Arts undergraduate degree in general education and liberal arts and the Associate in Science degree and Certificates of Achievement and Completion in numerous vocational and technical fields.

The Community Colleges serve a substantial cross section of the population as a result of an "open admission" policy that permits any high school graduate or adult age 18 or older to enroll. This policy provides maximum educational opportunities to the residents of Hawaii.

There are six colleges — Honolulu Community College, Kapiolani Community College, Kauai Community College, Leeward Community College,



Leeward Community College



Kauai Community College

Maui Community College, Windward Community College — and the Employment Training Office who report to the Chancellor for Community Colleges. (A seventh community college, Hawaii Community College, is part of the University of Hawaii at Hilo.)

Chancellor's Message

Dear Friends & Colleagues,

We are now in the midst of our Silver Anniversary, celebrating 25 years of service to our State.

As we begin the last decade of this century, we can reflect with pride upon our accomplishments and look forward with anticipation to an exciting future ahead.

During the last year, we have strengthened our connections within the community by expanding our partnerships with the State and local governments, the business community, other educational institutions, and private organizations. These ties have enriched our colleges, allowing us to better meet the needs of the people of Hawaii.

We have also continued to evolve as a major player in the international field, recognizing our responsibilities to prepare our students and our State for a global marketplace, and enhancing our capabilities to serve those beyond our own shores.

Our success has been due in large part to the assistance provided the Community Colleges from many sectors. Our faculty, staff, administrators, and students have received tremendous support from the State of Hawaii, the Board of Regents and President Albert J. Simone, private businesses, and countless friends in the community.

We hope that such collaboration will continue as we strive to create a strong Hawaii recognized as a leader both nationally and internationally.

Sincerely,

Joyce S. Tsunoda

Joyce S. Tsunoda
Chancellor

Exciting, New Developments

Many exciting developments have occurred in the last year, ranging from enhancement of the quality of our associate degree programs and agreements on articulation to new initiatives that promise expanded horizons for our campuses. Rather than attempt to include all of our accomplishments and new directions, our report this year focuses on the broad areas of Bridges to the Community, the Educational Continuum, Connections Beyond Our Shores, and Self-improvement.

Bridges to the Community

Because our institutions are "community" colleges, we pride ourselves on our close ties with individuals and organizations scattered throughout our Aloha State. Providing quality higher education is only part of our service aimed at meeting the needs of our unique communities.

Business Partnerships

As Hawaii moves into the 1990s with the lowest unemployment rate in the nation, our economy requires business and education to combine forces in developing the training programs needed to attract new workers, increase retention, and upgrade training.

Toward that end, the University of Hawaii Community Colleges are expanding our efforts in providing customized training to businesses in the State. In addition, we are working closely with the State Department of Labor and Industrial Relations and the Department of Business and Economic Development to improve our efficiency and performance in resource training requirements of the State.

Some examples of specific customized training programs:

- Docent training for Washington Place
- Business writing skills for the Sheraton Mirage
- Blueprint reading for Hawaiian Dredging
- Basic supervisory skills for International Savings & Loan
- Team building for McCaw Cablevision
- Basic welding for Matson
- Sign language for educational assistants for the Department of Education
- Medical terminology for Straub Clinic & Hospital
- Agriculture maintenance for Waimea Falls Park
- Editing for managers for State of Hawaii
- Report writing for Pearl Harbor

plus literally hundreds more.

Child Care

One of the most important issues facing Hawaii's workers today is child care. According to the Governor's Office on Children and Youth, almost three-quarters of school age children under the age of 15 live in households where the single parent or both parents work.

Led by Honolulu Community College, the University of Hawaii Community Colleges have taken a major leadership role in bringing together the resources of the State to concentrate on the issue of child care for Hawaii's working families. Honolulu Community College already provides training for child care workers serving infants and toddlers, based on the nanny system used successfully in Britain for over 50 years. HCC also operates a laboratory training model for preschool care, and was chosen by the State to train the project leaders and aides for the new A+ After School Care Program started in February, 1990, for K-6 grades.

In November 1989, we presented a conference on Child Care Options for Employers, bringing together the Governor's Office on Children and Youth, the Business/Child Care Connection of Parents Attentive to Children (PATCH), and the University of Hawaii Community Colleges to discuss possible approaches that employers might follow in developing child care plans for their workers.

The University of Hawaii Com-

munity Colleges are involved in an ambitious partnership with the City and County of Honolulu to operate their Early Education Center downtown, with courses provided by our Employment Training Office. We are also trying to join forces with private employers to open a first-of-its-kind model training center for infants and toddlers in a downtown location.

Visitor Industry Training

The dominant role of the visitor industry in Hawaii mandates an exemplary system of education and training to fill the tremendous range of employment opportunities with highly qualified personnel. The University of Hawaii Community Colleges have established a reputation of excellence in providing such training, and we anticipate continued achievement in this area.

Working closely with the National Executive Housekeepers Association, the Hawaii Hotel Association, the Hawaii Restaurant Association, and the American Hotel and Motel Association, the University of Hawaii Community Colleges have developed a Master Plan for Visitor Industry Education aimed at coordinating efforts across our campuses to provide the best training available in the field.

Maui Community College's Visitor Industry Training and Education Center has become a model of cooperation between the education and business communities, and the extensive programs at Kapiolani Community College have garnered much appreciated support from the industry.

Skybridge/HITS

Skybridge, first begun last year, is no longer simply a bold experiment in telecommunications linking the islands of Maui, Molokai, and Lanai. It has become an established component of MCC's outreach into the community, and is now a vital link in the delivery of education to Maui County.

Operating from Maui Community College in Kahului, MCC Learning Center in Kaunakakai, MCC Learning Center in Lanai City, and a new site in Hana, Skybridge provides completely interactive, two-way television that promotes communication and education between distant locations. Skybridge also allows Hawaii to be an active participant in national and international teleconferences, by serving as a receive site for satellite transmissions.

In the 1988-89 academic year, through Skybridge MCC provided not only 12 different academic courses (each meeting once or twice weekly), but also offered tutoring on a weekly basis, assisted State agencies such as the Department of Education with its meetings, and provided forums for the UH Center for Leadership in Education and Maui Economic Opportunity.

The Hawaii Interactive Television System (HITS) has also begun operations, with Kapiolani Community College, Leeward Community College, and Honolulu Community College already serving as three of the first receive sites in this ambitious state-wide telecommunications network. In the future, all of our campuses will be tied into HITS, expanding our capabilities to provide distance education opportunities and access throughout the State.

Nursing Education

With attention focused in 1989 on the statewide nursing shortage, Kapiolani Community College wasted no time in responding to calls for expansion of its health training programs. The new Associate Degree in Nursing (ADN) program enrolled its first students in January, 1989, and students are now being admitted twice a year to the ADN program.

Kapiolani Community College is now training 68 students in the new degree program, and upon completion the students will have the option of becoming Registered Nurses after passing the State Board nursing exam, or continuing their education by entering the third year of the BSN program at the Manoa campus.

A one-year Practical Nurse program at KCC prepares students to sit for the exam to become a Licensed Practical Nurse (LPN); graduates of the LPN program can also enter the ADN program with additional transition credit.

The Educational Continuum

As part of our efforts to break down the traditional barriers between the different branches of our educational system, the University of Hawaii Community Colleges are forging stronger ties both with the secondary schools and with the upper division branches of the University of Hawaii.

We hope this will provide a more comprehensive, coordinated approach that will facilitate the transition for those moving from high school to either the community colleges or jobs, for those leaving the community colleges and entering the workforce or continuing their education, and for those returning to the community colleges to upgrade their skills, change occupations, or re-enter the workforce after an absence.

DOE Articulation

The Oahu campuses and the Department of Education districts reached agreement this year on articulation of specific business education courses.

This agreement will allow high school students who receive "A's" in selected business courses to receive community college credit for those courses.

Maui Community College and Kauai Community College will soon sign similar agreements with the DOE districts in their counties.

This articulation of business courses will serve as a model for programs in other disciplines.

Project Reshape

Another effort to build bridges between our secondary schools and community colleges, Project Reshape focuses on the "average" high school students (those in the 5th-7th stanines) and counsels them on course work and options available through the University of Hawaii Community Colleges. This program is currently being operated by Honolulu Community College and Kapiolani Community College.

University Articulation Policy

This year marked a milestone for us—the adoption of the University-wide policy on articulation. After years of discussion, the fruits of our labor have finally paid off, and we can now look forward to providing our students with a smoother transition as they transfer within our state-wide system.

In preparation for implementation of the policy beginning with the 1989-90 academic year, we have redefined our associate degrees for quality and consistency across all our campuses, and have established Program Coordinating Councils (PCCs) for all existing Associate in Science programs as well as for the Associate in Arts degrees.

Connections Beyond Our Shores

Just as the economy of our State is changing, so is that of the mainland and of the world. Similarly, the very composition of our country is changing as immigration alters the physical and cultural face of our communities.

We consider it a primary responsibility of the University of Hawaii Community Colleges to prepare our students and our State for a future in which the much-talked-about global village will be an everyday reality.

In the last year, we reaffirmed our commitment to international education through a number of initiatives.

International Curriculum

In the final year of a United States Department of Education Title VIB grant, Kapiolani Community College expanded its International Business Export Program offering non-credit seminars to provide practical, short-term training for local businesses interested in entering or expanding their operations in the international marketplace.

Each of our campuses also offers a wide range of customized courses focusing on communication and management skills for individuals and companies working with international visitors and customers.

In terms of regular credit classes, our campuses offer a wide array of language and cultural programs focusing on the Asia and Pacific region.

Leeward Community College is developing an International Studies Program concentrating on Polynesian & Hawaiian Studies, Peace Studies, and an expanded Japanese Studies program.

International Training

The College of the Northern Marianas is finalizing an agree-

ment to have Kapiolani CC provide curriculum development and training in accounting, data processing, office administration, and tourism.

Maui Community College and Kapiolani Community College are sponsoring a health technical training project in collaboration with the UHM School of Public Health. This project provides on-site training in radiologic technology, medical laboratory technology and facilities maintenance for the U.S. Associated Pacific Islands of American Samoa, the Commonwealth of Northern Marianas, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Business and Hospitality Education curriculum materials have been provided to Lujian Vocational University, Jinlin Vocational College and the Wuhan Institute of Adult Education in the People's Republic of China. It has been estimated that the PRC will need 1 1/2 million technicians a year in order to develop its economy.

International Conferences

Kapiolani CC's Title VI grant supported a Conference on International Education hosted by Leeward Community College in March, 1989. The conference brought together faculty, staff, and administrators from each of our campuses in an all-day exploration of the issues of internationalizing the curriculum, developing an inventory of community college members with expertise in international concerns, and organizing projects to further the international emphasis of the community colleges.

In late April, 1989, the University of Hawaii Community Colleges co-hosted the first American Community College Fair in Tokyo along with the American Association of Community and Junior Colleges. Nearly 900 students and parents attended the fair to learn about the American community college system.

Kapiolani CC again conducted the annual Lokibo Medical Seminar for critical care physicians and nurses from Japan.

International Exchanges

Faculty and student exchanges took place this year between our colleges and Chofu Gakuen Junior College, Kagawa Junior College, Beppu University, and Kansai University.

Community College faculty also assisted with the East-West Center's Consortium for Teaching Asia and Pacific in the Schools (C-TAPS) project, which is developing materials to enhance the international literacy of our elementary and secondary school children in Hawaii.

Other faculty spent time teaching overseas on Fulbright fellowships to Malaysia and the People's Republic of China.

Accreditation

The Accrediting Commission of the Western Association of Schools and Colleges issued its report on January, 1989, reaffirming each campus' accreditation for the maximum period, six years. In addition to supporting each campus' efforts to achieve excellence, the Commission also commended the UH Community Colleges for voluntarily initiating a simultaneous accreditation of the Office of the Chancellor. This was the first time in the history of the WASC that a systems office had been evaluated, and some of the multi-campus systems in California are considering following our lead.

Assessment

The campuses have been working on pilot testing new assessment procedures in preparation for implementation of mandatory testing and placement as part of the admission process. At the same time, the campuses have improved remedial education and academic advising systems.

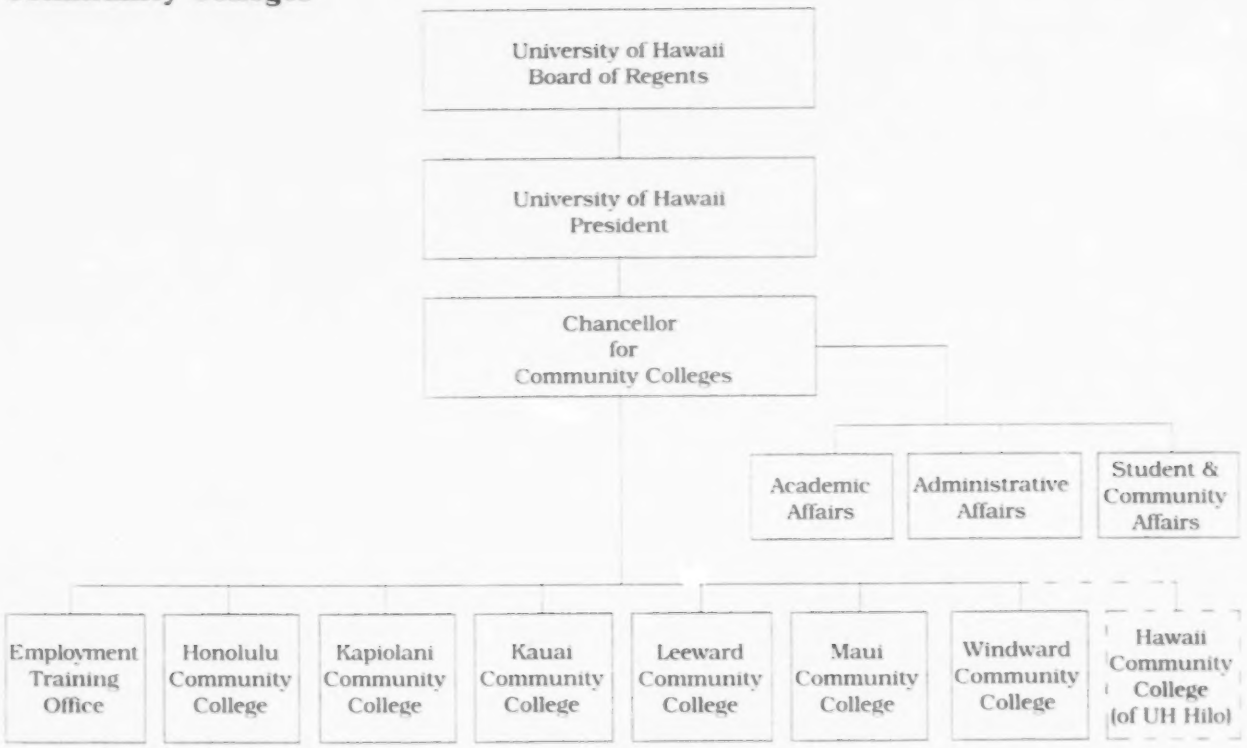
A student tracking system for monitoring student progress and retention is now being developed through the federally funded "Native Hawaiian Student Tracking System Study."

Learning Assistance Centers

Campus coordinators have been working on developing a delivery system for remedial instruction that includes a computerized system of monitoring learner progress through individualized learning systems. A commercial system called Comprehensive Competencies Program was tried, adapted, and revised to create our own approach which we call the Alternate Instructional Management System (AIMS). AIMS is now being pilot tested at the campus learning assistance centers.

Who We Are Now

Organization of Hawaii's Community Colleges



The Mission of Hawaii's Community Colleges

The Community Colleges of the University of Hawaii are committed to the mission of the total University:

"To provide all qualified people in Hawaii an equal opportunity for quality college and university education; to create knowledge and gain insight through research and scholarship; to preserve and contribute to the artistic and cultural heritage of the community; and to provide other public service through the dissemination of current and new ideas and techniques. In pursuing its charter, the University of Hawaii is committed to the development of the State's greatest asset, its people."

The mission of the Community Colleges also is consistent with the goals established by the State Postsecondary Education Commission and by the State Board for Vocational Education. Within this context, the Community Colleges of the University of Hawaii have as their special mission:

- To broaden access to higher education in the State of Hawaii by providing open door opportunities for students to enter quality educational programs within their community.
- To provide vocational and technical programs which both prepare students for immediate employment and provide the paraprofessional and trained work force needed by the State.
- To specialize in the effective teaching of general education and other lower-division liberal arts and pre-professional courses to prepare students to advance toward baccalaureate degrees.
- To provide opportunities for personal enrichment, occupational upgrading and career mobility through credit and non-credit courses and activities.
- To contribute to and stimulate the cultural and intellectual life of the community by providing a forum for the discussion of ideas; by providing leadership, knowledge, problem-solving skills, and general informational services in which the Colleges have special competence; and by providing an opportunity for community members to develop their creativity and appreciate the creative endeavors of others.

An Overview

The Community Colleges comprise an integral part of the University of Hawaii system.

Student Profile

The Community Colleges enroll 20,500 regular credit students and nearly 10,000 special students during a typical semester. The average student age is 26 years; 60% of the students attend school part time, with many working full time while attending classes.

Women account for more than half of the total enrollment, and the ethnic diversity of the Colleges reflects that of the community they serve. Students "stop-in" and "stop-out" of the Community Colleges' classes and programs, thereby making life-long learning an integral part of their life patterns.

(Enrollment figures reflect the number of students who are enrolled for credit in degree or certificate oriented programs. The Community Colleges serve an approximate addition of 6,000 more individuals in non-credit programs such as the apprentice and journeyworker training and the variety of short-term courses offered by each campus and the Employment Training Office.)

Faculty

The faculty of the Community Colleges provide quality education to meet the special needs of the community college students in Hawaii. The faculty is composed of individuals who have excellent academic backgrounds, as well as vocational and technical expertise and experience.

Because instruction is the primary mission of the Community Colleges, the faculty are adept at matching teaching styles to the student and situation. By effectively blending traditional and non-traditional academic/educational skills, the community college faculty effectively serve the diverse needs of the many students who enroll.

In addition to the regular instructional services at the campuses, the following services are also available:

Student Services

The Colleges offer counseling, advising, diagnostic testing, job placement, financial aid, student organizations and activities, and other specialized services for students.

Continuing Education & Other Community Services and Programs

There are life-long learning opportunities, including general education, basic skills, vocational training, and other specialized short-term courses and workshops, including customized training for businesses and industries.

Cultural and social learning opportunities, such as courses, workshops, personal interest seminars, and artistic performances, improve the quality of life for the individual.

Degrees and Certificates Awarded by the Community Colleges

Associate in Arts

An Associate in Arts is a liberal arts degree granted to students who successfully complete a two-year program of courses designed to transfer toward a baccalaureate degree.

Associate in Science

An Associate in Science is a degree granted to students who successfully complete a two-year program of vocational-technical courses and related general education courses. The purpose of the Associate in Science program is to prepare students for transfer to baccalaureate programs in applied fields. The degree certifies the completion of entry-level skills training for technical and occupational fields.

Certificates

Certificates are awarded to students who complete a program of vocational-technical courses leading to entry-level employment or job upgrading skills.

Honolulu Community College

Honolulu Community College is a modern, urban campus with the warm personal touch of an island college located only a mile from downtown Honolulu. The College offers a strong liberal arts program in addition to the largest number of vocational/technical offerings in Hawaii, including programs such as commercial baking, cosmetology, refrigeration and air conditioning, and aeronautic maintenance that are not offered at any other campus.

There are more than 4,000 regular credit students who come from throughout the State and the Pacific Basin area. An additional 3,000 are enrolled in non-credit or special courses and programs.

Honolulu Community College has cooperative education programs in 25 fields ranging from welding and carpentry to biomedical electronics and occupational safety. Students can get practical experience as part of their course work on campus in places like the campus bake shop, the auto repair and painting shop, the cosmetology clinic, and the campus media center.

Kapiolani Community College

Kapiolani Community College provides general higher education opportunities to the East Honolulu area, while also serving a statewide need for selected vocational programs. The College offers unique statewide programs in seven allied health fields and in legal assisting. In addition, the College offers an excellent liberal arts transfer program and vocational training in accounting, data processing, secretarial science, food service, hotel operations, nursing, and emergency medical services.

In addition to its regular credit program, Kapiolani also offers an outstanding array of non-credit courses to Honolulu businesses, senior citizens, and others in the community. Computer skills courses offered in a microcomputer lab at the Diamond Head campus are among the most popular of the school's non-credit offerings.

Students currently attend classes at one of two campus locations — Diamond Head, a spacious tree-shaded site on the slopes of the famous landmark, and Pensacola, a small five-acre site near downtown Honolulu. Student enrollment in Fall 1989 was more than 5,700 students. As each new construction phase of the Diamond Head facilities is completed, more college programs and services move in from the Pensacola site.

Kauai Community College

Kauai Community College occupies a beautiful 99-acre campus at Puhi, near Lihue. The atmosphere is quiet and conducive to learning. A campus center and a learning resources center are hubs of the campus, with surrounding buildings devoted to the fine arts, trade-technology, natural and social sciences, business education, and nursing.

Student population is 1,300. Students say the smallness of the island allows them to use all of Kauai as a campus. Classes make frequent trips to nearby beaches, historical sites and botanical gardens, and business and government leaders participate in the classroom process.

Programs help fill the need for trained employees on Kauai, in such critical fields as health care. Other strong programs include liberal arts, automotive mechanics, auto body repair, welding, carpentry, and business education, which includes accounting, clerical and secretarial, management, and visitor industry programs.

Leeward Community College

Leeward Community College, located between Pearl City and Waipahu, enrolls 5,650 students in vocational programs and liberal arts courses covering some 50 different subject fields. Classes are offered during the day and evening on campus, and off campus at the Leeward Community College at Waianae education center and on selected military installations on Oahu.

Leeward Community College has well-equipped classrooms, labs and shops, an extensive library collection, a campus center, and a theater. Special services are available for handicapped and disabled students, and for adults returning to college. Leeward CC also maintains an excellent career advising program to help individuals establish life, career, and educational goals. Remedial and developmental programs are offered in basic learning skills.

A broad-ranging community services program of non-credit classes, workshops, forums, and cultural activities including music, drama, and dance performances is also available.

Maui Community College

Maui Community College, between Wailuku and Kahului, occupies an open, spacious campus between the ocean and the West Maui Mountains. Stylized "Hawaiian hut" classrooms and offices are complemented by the modern library, the foreign language and science buildings, and the student center. Enrollment is 2,000, small enough to permit close personal interchange between students and faculty.

Special programs of note are those in food service and hotel operations, both pertinent to Maui's economic needs; a nursing career ladder program; and technology programs in agriculture, automotive, carpentry, and fashion technology.

Maui Community College also offers credit and non-credit programs and courses on the islands of Molokai and Lanai, and to the remote communities of Lahaina and Hana on the island of Maui, making MCC the only tri-isle campus in the University system.

To meet the needs of its diverse clientele, Maui Community College has taken the leadership in offering individualized competency based courses and televised instruction.

Windward Community College

Windward Community College primarily serves residents from Haleiwa to Waimanalo with a strong liberal arts program and certificate and degree programs in accounting, finance, secretarial science, automotive mechanics, and agriculture. Credit courses are offered during both day and evening.

The College offers many enrichment activities, including theatrical performances, a nationally recognized learning assistance program, and the annual Ho'olaule'a, a festival of music and dance that draws thousands of people to the campus. In addition, the community services program offers a wide selection of non-credit courses and cultural programs.

More than 1,600 students attend classes in one of the most beautiful settings in Hawaii. Located at the base of the Koolau mountains above Kaneohe town, the College occupies 45 acres of lush greenery. Plans are being developed for new facilities on the campus to meet the needs of future generations of students.

Employment Training Office

The Employment Training Office (ETO) is the job skills and transition center located at 600 Pensacola Street. In the 28 years of its commitment to the people of Hawaii, ETO has delivered a variety of training programs to community and military personnel.

The primary focus of ETO programs is job training for populations who are classified as "at risk" or "hard to serve." Training for high demand employment opportunities centering in food service, auto repair, construction occupations, and office technology is available.

ETO continues to provide customized short-term training based on the needs of the community, for example, school bus aide and driver training for the department of accounting and general services and respite program for the department of human services.

ETO provides pre-screening for community employers through job search and through transition support with basic skills development in the Learning Center. Career exploration for department of education students is an alternative education option with credits to be applied to graduation from their home school.

While other campuses address the needs of the traditional academic student, ETO specializes in the needs of the non-traditional, ready-for-work student, supported with funding from the state departments of labor, education, human services, accounting and general services, and the City and County of Honolulu.

Looking Ahead

The University of Hawaii Community Colleges look forward to continuing the tradition of excellence that has been established over the last 25 years. As we begin a new decade, we are faced with tremendous challenges and exciting opportunities. Some will result from changes already under way in our society, while others will develop from unique circumstances never before experienced. It is essential for our Community Colleges to expand our horizons and maintain a flexible approach in adapting to a rapidly changing world.

A forthcoming document, "Expanding Horizons," outlines our visions for the future of the Community Colleges. While cultivating this vision and maintaining the highest possible quality of our programs, the colleges are now paying particular attention to access, student achievement and retention, and our role in the economic development of the state.

Access, Achievement, and Retention

Just as we are committed to maintaining our reputation for quality higher education, we are likewise determined to remain a "people's college" for any adult in Hawaii. Part of that commitment in future years will involve increased attention to student achievement and retention.

Flexible programming that is sensitive and responsive to the people's needs as well as the dramatic new avenues telecommunication and computer technology are providing will enable more people to have access to the community college. Once students are enrolled, our task is to assure that they succeed in such a way that when they leave they will possess the skills to be life-long learners — staying and returning for more knowledge throughout their lives. This is more than measuring success in terms of the numbers of certificates and degrees awarded or the rate of student transfers to four-year institutions.

We want to extend our student services to provide the counseling and assistance necessary to help all of our students achieve their individual goals and objectives. We want to promote our colleges and programs so that there will be more public awareness of the opportunities at the Community Colleges.

Tremendous progress has been made in harnessing the power of the computer to serve as a valuable tool in administration, finance, communication and curriculum development, and we will work to continue our mastery in this area. In 1990 each community college campus should be connected to the Hawaii Interactive Television System (HITS), allowing the Community Colleges to reinforce their position as major centers of education and enrichment.

Community Colleges' Role in Economic Development

Future community college endeavors no doubt will include more emphasis on educational partnerships to affect in a positive way the economic development of the state. In discussions with the department of labor and industrial relations, we consider ways in which the Community Colleges can facilitate human resources development in our state. We are also working closely with the department of business and economic development, the department of education, as well as other government and private organizations, in conducting needs assessments and in developing training programs to meet those needs.

In preparing our students for the future we will teach an awareness of the international marketplace as well as an awareness of the ever-increasing cultural diversity within our own communities. We are working to initiate relationships with other educational institutions in the Asia and Pacific region, beyond those that we already maintain in Japan. We will continue working with the American Association of Community and Junior Colleges in international initiatives, working to the best of our ability and resources to provide the education and training that will make Hawaii and the University of Hawaii Community Colleges recognized leaders in the Asia/Pacific region.
